All these measures, notwithstanding, result in no injury to the democratic party, which continues united as in one man. England is busy in fortifying her entire coast. Admiral Hogle has received orders to repair to Plymouth and to take command of the squadron; at the same time. Vice Admiral Walker is ordered to the squadron at Portsmouth. The British fleet in the Mediterranean commanded by Admiral Napier, has also received orders to repass the straits of Gibraltar. Thus the policy pursued by the powers of the North is by no means favorable to their interests, inasmuch as they are forcing England into the support of the democratic movement on the continent. Louis Napoleon, waxing bold in the promises of the despotic powers of Europe, and enriched by the spoliation of the unfortunate exiles, submits unhesitatingly to the dictation of the representatives of the three powers.
